Bangalore, India

Objective

To gain hands-on experience as a Software Development Engineer, where I can apply my programming skills and strong problem-solving abilities. I am passionate about building real-world solutions and eager to learn, grow, and contribute with full dedication in a dynamic tech environment

Education

REVA UNIVERSITY (B.Tech)	2022 - 2026
CSE (Artificial Intelligence & Data Science)	CGPA: 8.0
Reva Independent Pre-University College	2020 - 2022
Specialization in PCMC	Percent: 94

Skills Summary

- **Languages:** Python, C++ , Java
- **Databases/OS:** MySQL, Linux, Windows
- **Machine Learning:** Supervised learning, Unsupervised learning, NLP, Computer Vision
- **Libraries:** Pandas, NumPy, Matplotlib, PySpark, nltk, dplyr, ggplot2
- **Frameworks/Tools:** PowerBI, Google Collab, Jupyter Notebook Critical thinking,
- **Soft Skills:** Problem Solving, Effective Communication

Projects

Movie_Classification_genre | [LINK](#)

- Developed a machine learning model to classify movies into multiple genres using Python.
- Conducted data preprocessing and feature engineering on movie datasets, utilizing Pandas, NumPy, and Scikit-learn in Jupyter Notebook.

stock_analysis_app | [LINK](#)

- Built an interactive Python application for stock market analysis, focusing on historical data trends and patterns.
- Leveraged Pandas, NumPy, and Matplotlib for data processing and visualization, enabling real-time stock performance tracking.

Certificates

- **Big Data (IBM)** - [Link](#)
- **R Programming for Beginners: Understanding Data Frames, Factors, & Strings (Infosys)** - [Link](#)
- **Journey to Cloud: Envisioning Your Solution (IBM)** - [Link](#)
- **Data Visualisation: Empowering Business with Effective Insights (TATA)**
